

Data Exchange 2 Worksheet

Are the following statements True or False?	
Transmission modes are the ways in which data is deleted across a network	True/ False
Transmission modes are defined by the direction of the flow of data	True /False
Different methods of transmitting data can be sent simultaneously	True/ False

What do the following words mean?	
unidirectionally	Only travels in one way
bidirectionally	Travels both ways

What are different types of transmission methods?
1. Simplex 2. half duplex 3. full duplex

What kind of devices use simplex transmission?
Smart speaker

What devices use half-duplex transmission?
Walky talky

What devices use full-duplex transmission?
Modern internet networks

What types of Transmission do these explanations describe?	
serial	Bits of data are sent one at a time over a single wire or channel.
Parallel	Allows the sending of a number of bits of data simultaneously over an equal number of wires or channels.

What does USB stand for?
Universal serial bus

Where are you likely to see USB ports used?

Desktop computers

What is the difference between client and server side processing?

Workload size

Name three things that client side processing is commonly used for on a webpage

1. Form validation
2. animations
3. responsive design

What are the major advantages that client-side processing has over server-side processing?

Name four things that server side processing is commonly used for on a webpage

1. .networking
2. .data sorting
3. .
4. .

What are the major advantages that server-side processing has over client-side processing?

Improve performance and reduced data being sent over at once
